SONAR FLOAT COVER & PAYLOAD STATION

HIGH RESOLUTION SONAR

Provides high resolution bottom imagery for locating drowning victims, submerged vehicles and sunken boats.

SIDE SCAN SONAR

MAX Mode: Maximizes sonar resolution through thermoclines and other water column interference
CLEAR MODE: Allows for adjusting the bottom TVG without amplifying water column interference
3 COLOR PALETTES: 3 color palettes provide even more flexibility on the water to deal with overcast or full-sun conditions.

For more information, go to www.emilyrobot.com or call 520.203.8351
